

DÉCORTECH HOOP PINE

Décortech Hoop Pine is available in both Interior and Exterior grades. Interior White Hoop Pine is a premium grade plywood with a fine, even grain. Pressed at low temperature to preserve a lighter, cleaner and more even face, it has an excellent edge detail and is ideal for decorative applications. Exterior Hoop Pine is darker in colour, carries an F17 stress grade and is suitable for semi exposed applications.

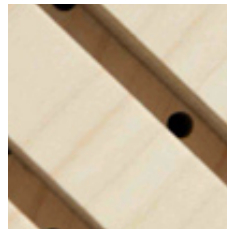

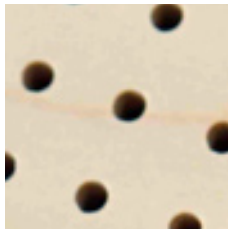

Décortech Hoop Pine is the perfect environmental choice as it is manufactured to AS/NZS 2270 standard and is 100% sourced from sustainable, plantation grown forests with an E0 formaldehyde rating.

Décortech Hoop Pine is carefully selected for a high quality decorative finish and is ideally suited to high end architectural applications. AC grade is suited to ceiling and wall panels and AA grade is suitable for double-sided applications, such as screens and partitions, especially where the exposed edge is featured.

Available in a full range of stylish acoustic perforations both standard and fully customised, Décortech Hoop Pine Plywood can add natural warmth and elegance to any space.

Why Wood?

Décortech specialises in decorative, acoustic and fire retardant timber panels utilising the many benefits of wood, including its renewability, sustainability, energy efficiency, and natural elegance. Timber brings a modern and warm look to any space and our Décortech Hoop Pine is enhanced by our Décortech factory applied clear satin finish for a premium result every time.

Décortech Hoop Pine is available in a range of stylish finishes and perforations.
